Bachelor of Science in  
Architecture, University of  
Colorado Boulder

Construction Management  
Certification, Columbia  
University

30-HR OSHA Training for the  
Construction Industry

### Specializations

Project Management  
Construction Management

### Area of Expertise

As a Project Manager with LCK, I oversee projects from preconstruction through completion, providing owner representation and hands-on leadership to ensure projects are delivered on time, within budget and to the highest quality standards. With experience across commercial, civic, education and large-scale mixed-use developments, I bring a collaborative, detail-driven approach to every assignment.

My strengths include project scheduling, cost forecasting, subcontractor coordination and stakeholder communication. I'm known for my ability to lead teams through complex challenges, manage multiple priorities and maintain clear, consistent communication with owners, consultants and contractors. My background in architecture and construction allows me to bridge design intent with constructibility, supporting efficient decision-making and successful project outcomes.

### Business and Educational Background

Before joining LCK, I served as a Project Manager with a regional general contractor in Charleston. I managed the construction of a \$150 million luxury condo building on Kiawah Island and started on a \$200 million luxury multifamily in project downtown Charleston.

Previously, I held project management roles in both New York City and Charleston, serving assistant Project Manager and then Project Manager.

I earned a Bachelor of Science in architecture from the University of Colorado Boulder. I am pursuing a Masters of Business Administration in Innovation and Entrepreneurship from Clemson University. Also, I received my construction certification from Columbia University.

### Community Involvement

Outside of work, I enjoy spending time on the water, whether it's fishing, boating or relaxing at the beach.

I am an avid fly angler, frequently traveling for the sport. This allows me to be actively involved in several fly fishing conservation organizations, participating in related events whenever possible.
