Specializations

Project Management

Tauana Kim

Area of Expertise

I use my detail-oriented and results-driven approach to support the preconstruction team with document reviews, estimates, reporting, cost management and value analysis to ensure efficiency and quality control when planning our clients' projects.

My strong foundation in operations, procurement and client support allows me to successfully manage cross-functional projects, coordinate multiple priorities and optimize workflows to enhance efficiency and accelerate the success of LCK and our clients.

Recognized for my ability to proactively problem-solve, I thrive in fast-paced environments.

Success to me means being able to appreciate where you are in life, personally and professionally, through grateful eyes, despite the curve balls life inevitably throws your way.

Business and Educational Background

Prior to joining the LCK team, I served as a project administrator at Industrial Project Innovation, where I supported more than \$15 billion in managed work annually.

I have over 10 years of customer support experience, allowing me to facilitate successful cross-team collaboration.

Community Involvement

Outside of work, I am an avid reader and traveler (I'm fluent in Portuguese) and I enjoy volunteering at the school that both of my young children attend to help support the hard-working staff and educators.
